## The Beggar's Rags

A beggar lived near the king's palace. One day he saw a proclamation posted outside the palace gate. The king was giving a great dinner. Anyone dressed in royal garments was invited to the party.

The beggar went on his way. He looked at the rags he was wearing and sighed. Surely only kings and their families wore royal robes, he thought. Slowly an idea crept into his mind. The audacity of it made him tremble. Would he dare? He made his way back to the palace. He approached the guard at the gate. "Please, sire, I would like to speak to the king."

"Wait here," the guard replied. In a few minutes, he was back. "His majesty will see you," he said, and led the beggar in.

"You wish to see me?" asked the king.

"Yes, your majesty. I want so much to attend the banquet, but I have no royal robes to wear. Please, sir, if I may be so bold, may I have one of your old garments so that I, too, may come to the banquet?" The beggar shook so hard that he could not see the faint smile that was on the king's face.

"You have been wise in coming to me," the king said. He called to his son, the young prince. "Take this man to your room and array him in some of your clothes."

The prince did as he was told and soon the beggar was standing before a mirror, clothed in garments that he had never dared hope for. "You are now eligible to attend the king's banquet tomorrow night," said the prince. "But even more important, you will never need any other clothes. These garments will last forever."

The beggar dropped to his knees. "Oh, thank you," he cried. But as he started to leave, he looked back at his pile of dirty rags on the floor. He hesitated. What if the prince was wrong? What if he would need his old clothes again. Quickly he gathered them up.

The banquet was far greater than he had ever imagined, but he could not enjoy himself as he should. He had made a small bundle of his old rags and it kept falling off his lap. The food was passed quickly and the beggar missed some of the greatest delicacies.

Time proved that the prince was right. The clothes lasted forever. Still the poor beggar grew fonder and fonder of his old rags. As time passed people seemed to forget the royal robes he was wearing. They saw only the little bundle of filthy rags that he clung to wherever he went. They even spoke of him as the old man with the rags.

One day as he lay dying, the king visited him. The beggar saw the sad look on the king's face when he looked at the small bundle of rags by the bed. Suddenly the beggar remembered the prince's words and he realized that his bundle of rags had cost him a lifetime of true royalty. He wept bitterly at his folly. And the king wept with him.

We have been invited into a royal family - the family of God. To feast at God's dinner table, all we have to do is shed our old rags and put on the "new clothes" of faith which is provided by God's Son, Jesus Christ. But we cannot hold onto our old rags. When we put our faith in Christ, we must let go of the sin in our life, and our old ways of living. Those things must be discarded if we are to experience true royalty and abundant life in Christ.

## *Ons voorbereiding vir broei seisoen*

***FeatherLove***
***Danie en Pearl Strydom***

**Broei seisoen en voor bereidings**

Ek is gelukkig om saam met my vrou (Pearl) in 'n venootskap te wees met die duiwe, ons hoof ras is Fantails, maar Pearl het nou Old German Owls aan geskaf. Ons het nog te min ondervinding met die Old German Owl ras, maar sal ons broei seisoen en voor bereidings van die Fantails graag met julle wil deel. Ons het die eerste jaar baie gesukkel met onvrugbare eiers, maar het verskeie ander teelers genader en hulp gevra, het na almal geluister en se raad probeer volg en dit gekombineer en ons was redelik suksesvol en baie gelukkig die broeiseisoen. Ons het 70 kuikens gering van 10 broei pare van begin Augustus 2019 tot einde November 2019.

**Ons broei hokke**

Is 900mm lank, 600mm breed en 500mm hoog. Dit is gemaak uit ou staal stoor rake, met die agter kant en bo kant toe en die voor kant en sy kante is met galvanise mesh toe gemaak (100mm x 50mm). Die broei hokke word Junie mooi skoon geskrop met Jik en 1 week later word die hokke met skoon asyn gespuit, ons spuit elke 2 de week die hokke met asyn en middel Julie spuit ons shoofly en die laaste week van Julie word die duiwe op gepaar.

**Op paar van pare**

Dit is nie net van vang en by mekaar gegooi nie. Ons gebruik so 2 weke om die beste moontlike duiwe op te paar, daar word gekyk watter cock watter hen se eienskappe kan verbeter. Die duiwe word ontwurm as hulle in broei hokke gesit word en 3 dae later begin ons vir elke duif elke 3de dag 4 dagga pitte en 2 brouers heast pille te gee. Die duiwe kry ook een keer 'n week 'n kruie mengsel wat ons meng en sal dit later gee. Elke Saterdag aand word die water weg gevat en die Sondae kry hulle 'n rooibos tee mengsel wat ek ook later sal gee. Die Fantail se sterte moet geknip word en onder moet al die donsies versigtig geknip word om goeie broei records te kry.

**Nes panne**

Ons gebruik go carts wiele wat middel deur gesny en om gedop word vir nes panne, in die nes panne gebruik ons tef gras vir nes materiaal en ons gooi karbadust in die nes panne, daar word net een nes pan in elke hok gesit en as die kuikens uit gebroei het en die kuikens is so 10 dae oud sit ons nog 'n nes pan in, want dan gaan die hen weer begin lê in die nuwe nes pan. Wanneer die volgende stel eiers uit broei word die eerste kuikens gespeen, sodat die pa en ma weer al hulle aandag aan die nuwe kuikens kan gee. Gedurende die broei seisoen gee ons elke 2 de dag 2 brouers yeast pille om

die ouers in goeie kondisie te hou. Ons gee wortel sap om te help met vitamien aanvullings, geen onnodige medikasie nie.

**Entings**

Wanneer die kuikens begin rond beweeg in die broei hokke, spuit ons vir PMV1 en New Castle deseased, en weer as ons hulle speen en in speen hok sit spuit ons weer. Dan spuit ons al die duiwe middel April weer vir PMV1/ND.

**Rekordhouding**

Rekordhouding is een van die belangrikste aspekte van enige boerdery vir my, dit moet deeglik en akkuraat gedoen word, anders mors jy net jou tyd.

Eiers gelê die broeiseisoen – 87 eiers
Bevrugte eiers – 85 eiers = 98%
Onbevrugte eiers – 2 eiers = 2%
Kuikens uitgebroei – 74 kuikens = 87%
Kuikens gering – 70 = 95%
Ons gebruik so min as moontlik medikasie en die volgende kruie mengsels help ons duiwe om gesond te bly:

**Rooibos tee mengsel**

1Lt water
5 Sakkies rooibos tee
5 Heel naeltjies
3 Stokkies Kaneel
Gooi alles saam in 'n pot en kook vir 30 minute, laat staan om af te koel en gooi in houer en bêre in yskas. Gooi 50% tee mengsel met 50% vars water vir duiwe 1 keer 'n week.

Kruie mengsel:
80 gram Borrie
80 gram Fyn Kaneel
80 gram Fyn Naeltjies
80 gram Cyane Pepper
40 gram Fyn Gemmer

Meng alles saam en bêre in digte plastiek houer. Maak die kos 1kg klam met Canola oile en gooi so 10 teelepels kruie mengsel op en meng mooi deur, laat staan vir so 1 uur om droog te word en gee vir duiwe, dit gee ons ook 1 keer per week. Ons gee elke 2de week wortelsap vir die duiwe wat ons ook 50% wortel sap en 50% water vat, die wortel sap koop ons by Food Lovers Market (Fruit en Veg city), maar sien Spar verkoop dit ook nou.

**Voermengsel**

Ons voer dwars deur die jaar ons duiwe net Roller Mix, 1 eetlepel in die oggend en halwe eetlepel in die aand per duif, vir ons werk dit, want ons het net so 80 fantails en nie soos ander boere wat honderde duiwe het nie, hulle sal iets anders moet uitwerk wat vir hulle gaan werk en maklik sal wees. Die duiwe kry gereëld skulp gruis, ons is bevoor reg om naby die see te bly en gaan tel dit sommer op en sif dit op die strand. As daar kuikens in die neste is gee ons elke 2de dag swart Sparkie, dit lyk of die kuikens beter groei en meer gesond is as die wat nie gekry het nie.

***Newcastle Disease From Internet Submitted by***
***FeatherLove***
***Danie & Pearl Strydom***

**• Induction:**
There are a lot of questions about Newcastle disease. Some people say that pigeons can't get the disease and other said again the opposite. This confuses me and I did a bit of researched to help to keep my pigeons and myself healthy.

**• What is Newcastle disease and what causes it?**
Newcastle disease is a contagious viral disease of birds and considered one of the most important poultry diseases worldwide. The disease can vary from mild to severe. A highly contagious and severe form of the disease, called exotic Newcastle disease (END), is so deadly that many birds die suddenly without showing any signs of disease.

**• What animals get Newcastle disease?**
Both domestic and wild birds can be affected by

National Editor - E-mail: cora.christo@gmail.com - Cell: 076 313 2873

Newcastle disease. Chickens are very susceptible to the disease. Turkeys, ducks, geese, as well as parrots, pigeons and wild cormorants can also get END.

### • How can my pigeons get Newcastle disease?

Newcastle disease is spread by direct contact with the droppings or respiratory discharges of infected birds. The virus can live for a long time in the environment and can be spread by objects (fomites), such as shoes, clothing, and equipment that have become contaminated by infected birds. Outbreaks have occurred from illegal imports of exotic birds.

### • How does Newcastle disease affect my pigeons?

Newcastle disease in birds can vary from no signs of illness to sudden death. Affected birds may have coughing, sneezing, nasal discharge, depression, and diarrhea. Chicken flocks may have a sudden decrease in egg production or produce thin shelled eggs. Signs of severe illness include swelling of the tissues of the head, muscle tremors, dropping wings, twisted head, circling, paralysis or sudden death.

### • Can I get Newcastle disease?

Yes. Infection is rare and usually very mild. People in direct contact with infected poultry or other birds can get conjunctivitis (swelling and reddening of the tissues around the eyes. Poultry crew and laboratory workers would be at the greatest risk for potential exposure to the virus during their work. No human cases of Newcastle disease have occurred from eating poultry products.

### • Who should I contact, if I suspect Newcastle disease?

**In Animals** – Contact your veterinarian immediately.

**In Humans** – Contact your doctor. Tell him or her you have been in contact with birds with Newcastle disease.

### • How can I protect my pigeons from Newcastle disease?

Prevent your birds from becoming exposed to infected birds. Bio security measures, such as cleaning and disinfection of bird – housing facilities and equipment are very important. New introductions to the loft should be isolated for several weeks before being placed into the loft. A vaccine is available for birds and is routinely used in pigeons. While this can reduce the severity of disease, it does not completely prevent infection.

### • How can I protect myself from Newcastle disease?

When working with pigeons, especially when they are ill, wear protective clothing such as gloves, and safety glasses. Wash your hands after contact with pigeons. Avoid touching your eyes until your hands have been washed. People working with the virus in laboratories or on vaccination crews should take extra precautions.
